

“ Really understand how to make your processes flow ”

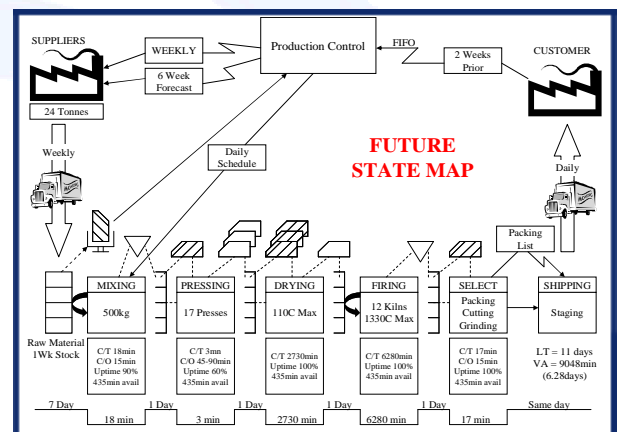

Workshop summary

This practical and hands on course will help you understand the power of Value Stream Mapping as a tool to identify and clearly focus, business improvements in your organisation.

The workshop is as relevant for a clutch manufacturer as it is for a hospital, or chemical company or public works department

Workshop content:

- Understanding the concept of VSM
- Understanding Value and flow
- Why is VSM such a valuable tool
- Where would you use VSM
- Who typically uses VSM
- How to select a value stream
- Deciding what data to collect
- How to construct a current state map
- Defining the future state map
- Constructing the value stream plan
- Agreeing future actions for your organisation

The workshop format will be highly interactive, with exercises to reinforce learning, and a case study will run throughout the day tying in the key learning. Each delegate will develop an action plan to embed the learning in their organisation.

Course Length: 1 Day

“

The programme has facilitated change and shown us all how we can work in different ways for the benefit of the company

Operations manager, earth moving tyres

”

“ Really understand how to make your processes flow ”

Who should attend?

People in your organisation who are challenged with and keen to improve end to end processes, typically:

- Senior managers and directors.
- Functional managers and operations management
- Improvement facilitators or CI managers

You will be more likely to implement the learning if you send more than one delegate.

How will this workshop improve yours and your organisations performance

- You will look at processes differently and see the waste that was hidden before
- You will understand how to develop better flow to improve operational performance and reduce cost
- You will understand the tools and keys to developing a value stream map for your organisation
- You will be given a structured format to develop buy in from key stakeholders/managers
- You will have a toolset and the confidence to uncover problems in your processes
- You will take away specific actions to improve your own organisation

“

Good depth to discussions on processes; cant wait to get started.
